PROJECTS

- Healthcare Management using Blockchain** Jan- May 2024
 - Developed a healthcare mobile application utilizing blockchain technology to empower users to manage their health through a user-friendly interface and receive personalized recommendations toward holistic well-being. The app integrates features such as personalized diet plans, exercise tracking, and BMI calculation.
Team size: 4
- Pet Adopt Portal** Apr- May 2023
 - I built the Pet Adopt portal website as a front-end developer. I designed landing pages, adoption pages, and other website elements collaboratively with the front-end team.
Team size: 1
- Canteen Managment System** Feb-May 2022
 - Developed and implemented a Canteen Management System within a 4-month timeframe, utilizing a tech stack of MySQL, HTML, CSS, Javascript, PHP, and Bootstrap. The user-friendly application allows online registration, e-menu browsing, and food ordering.
Team Size: 3
